HPI Connect Fair 2016

IT-Speed-Dating
at its best!

Potsdam | 19th of May 2016

HPI Connect Fair: IT-Speed-Dating

Once a year the HPI brings companies and students together at the traditional HPI Connect Fair. You can use the opportunity for personal contact with students of the Hasso-Plattner-Institute and present career opportunities at your company. We are looking forward to your participation.

In contrast to other job fairs students have to make a binding registration for the IT-Speed-Dating. In small groups of not more than 6, they visit the company booths for about five minutes – as an exhibitor you can present your company to the students in a personal conversation. At the subsequent get-together the first contact can be deepened on an individual basis. HPI Connect takes place every year at the beginning of the summer semester.

HPI Connect: Your recruiting opportunity

In addition to the annual Connect Fair the Hasso-Plattner-Institute gives companies the opportunity to have direct contact with individual HPI students and alumni with its **Job Portal**. Register at www.hpi.de/connect/jobportal to post job offers and publish a company profile or to browse the profiles and CVs of HPI students and alumni.

Studying at the HPI: excellent and practice-oriented

The Hasso Plattner Institute in Potsdam is the only university institute in Germany to offer a Bachelor and Masters degree program in IT Systems Engineering – an award-winning very practically-oriented Computer Science Study Program. In recent years the HPI has continuously achieved top rankings in the CHE-university rankings. At present there are 490 Bachelor and Master students. In addition the HPI has 130 doctoral candidates.

The focus of the university education at Hasso-Plattner-Institute is on IT Systems Engineering and, in particular, the aspect of software. Students are first introduced to the fundamentals of computer science and subsequently focus on the conceptualization and development of complex software systems. The course content is specifically tailored to fit the present and future challenges of the IT industry. It includes a comprehensive soft skills program and courses in entrepreneurship.
