

**Hasso Plattner Institute** is a world-wide unique place for Digital Engineering, Design Thinking and Entrepreneurship. As a privately funded institute, we offer our students unique, tuition-free programs in IT systems engineering and data engineering that are practice- and innovation-oriented. Academically we are constituted as joint Digital Engineering Faculty of HPI and the University of Potsdam. We also provide excellent research and teaching.

**HPI School of Entrepreneurship** is the central hub at HPI when it comes to entrepreneurial thinking and action. We offer lectures, experience-driven programs, events and broad support motivating and empowering digital talents to become the innovators and makers of the 21<sup>st</sup> century. Together with students, scientists and partners we build scaling products and startups based on new ideas, technologies, and scientific research work. Together with our investment vehicle and startup cultivator **HPI SEED** we operate and grow the HPI Entrepreneurship Ecosystem and its community.

To further expand our offers, we are seeking ambitious, execution-driven and committed team members (m/f/d) as

## Research Assistant / Ph.D. Student

combined with a position as Program Manager & Startup Coach at HPI School of Entrepreneurship

### Your Role

- You will have a great possibility to write a doctoral thesis in the fields of entrepreneurship or computer science and to link it closely to your work at School of Entrepreneurship
- You will actively shape with us one of Europe's leading ecosystems for tech founders and startups
- You will be responsible for the preparation and delivery of one of our core lectures/programs, e.g. the HPI Product Builder, or the creation and delivery of new formats
- You will be responsible to prepare and organize events and workshops around Entrepreneurship, e.g. the HPI Best Idea Award or Boot Camp
- You will coach founder teams and startups from the HPI ecosystem and will work closely together with our unique investment vehicle **HPI SEED**

### Your Qualification

- You hold a Master's or diploma degree in business administration, economics, business informatics or in another related discipline with excellent results
- You ideally bring experiences in working with founders and startups about how to setup and grow digital products and/or businesses
- You enjoy teaching and coaching around the topic entrepreneurship
- You execute and learn fast, you are a team-player, and you enjoy working with high levels of accountability, responsibility and commitment
- You are excited about facilitating the creation of more impactful products and startups in a high-profile tech ecosystem
- You possess strong communication and presentation skills in both English and German

### Our Offer

- You can link your PhD thesis to your daily work at HPI School of Entrepreneurship providing access to a great number of research relevant topics and partners within Europe, the US and beyond
- If required, we support you in finding a chair and supervisor for your doctoral thesis
- You shape with us the future of digital entrepreneurship around one of Europe's leading digital institutions
- You become part of a motivated and open team in an inspiring and international environment
- We offer a secure job with a competitive compensation, flexible working hours, and flat hierarchies directly located at the border between Berlin and Potsdam
