Data Science for Precision Oncology: Lessons Learned from the NCT/DKTK MASTER Program Dr. Andreas Mock – National Center for Tumor Diseases Heidelberg

Short Bio: Andreas is a physician-scientist working at the National Center for Tumor Diseases (NCT) Heidelberg and there a member of the MASTER program. Currently, he is conducting his clinical specialization in internal medicine, hematology and oncology. Furthermore, he holds a postdoc position at the German Cancer Research Center (DKFZ) performing research on RNA-based methodologies and predictive algorithms for precision oncology. In addition, he is a medical advisor to the international consortia, such as HiGHmed and EUCANCan. Furthermore, Andreas received formal training in computational biology.
