The first (Planning) meeting in review

- *Take 5 minutes*
- What *went well* in your first meeting?
- What is the *first thing that should be improved* next time?
- What part of the *Scrum process* seems the most challenging (for your team)?

The PO role is challenging. We’re serious about the only 50% dev thing.
Custom Team Checklists

The ideal state
- Starting from your collected notes construct a list of checks for your team
- *Take 15 minutes*

Inspiration
- Henrik Kniberg's “unofficial Scrum Checklist”
  (https://www.crisp.se/gratis-material-och-guider/scrum-checklist)
- "Assess your agile engineering practices" by Corinna Baldauf
  (https://finding-marbles.com/2011/09/30/assess-your-agile-engineering-practices/)
- Spotify’s “Squad Health Check”
  (https://engineering.atspotify.com/2014/09/16/squad-health-check-model/)
- Pierson Requirements Group “Agile Scrum Process Checklist”

What are things you wish for your team in the future? Not just technical…
Reflecting on SM tasks

- *Take 10 minutes*
- What is the **hardest, most challenging thing** about the SM role?
- What aspect could be the **most fun**?
- How can/should you **collaborate**?
- What does the dev team need help with?
- What does the PO need help with?
Sprint Review

At the end of the sprint there is the Sprint Review

- *Let’s discuss*
- What would **define a successful review**?
- How would you imagine it to be **structured ideally**?
- What are **prerequisites**?
- What is your role in this meeting?

What role could a Definition of Done for your team play here?
Time to reflect as a team

- Take 10 minutes
- Pick an activity from [https://retromat.org/](https://retromat.org/) for “Set the stage” or “Gather data” phase
- Pick one you like best, one that would work in your team
- Describe it to everyone
Questions

Which uncertainties are left?
- How should we support Scrum Masters going forward?
- What support would you like?
