

COLLABOUSE - creativity test for teams and individuals

Automatic creativity test

The test results can be evaluated automatically using the C-Tracer

WHY conduct this project?

The CollaboUse is a test developed to deliver fully automated creativity assessments for individuals and teams, based on the testing logic of the Alternative Uses Task. The CollaboUse can be taken online, with test-takers prompted to think up many, diverse and original ideas in three minutes by combining items to realize their ideas. When taking the test in a team, partners can join on one computer or join the task remotely.

Try the CollaboUse online

Get your team together or play by yourself, CollaboUse is available here: collabouse.corinnaj.me

ADD SUGGESTION

WHAT are the outcomes and tools you can use?

You can take the CollaboUse test online, either by yourself or with your team. A prompt and ten items will be randomly selected, so the task can be repeated many times. If you are interested in your results, simply download the generated file at the end, send it to us, and we will get back to you with your results.

WHOM to contact?

If you are interested in learning more about the CollaboUse or in using it for your own creativity assessments, feel free to reach out to us. We look forward to hearing from you.
