

Computational Science Student with knowledge of LLMs wanted! (m/f/d)

We are looking for a motivated computational science student for the Prof. Dr Bolsover office to help in the development of a data visualizer for our project.

What we want from you:

- Good command of Python is required (R is a plus)
- Experience with fine-tuning Large Language Models
- Data management skills
- Experience with data visualization tools
- Willingness to learn and problem solving
- Ability to work independently and manage own working time
- Familiarity with international politics is a plus

What do you get with us?

- Freedom to design, develop and launch an innovative visualizer for social science purposes.
- Flexible working hours
- Unique opportunity to be part of an interesting and highly topical research project
- Opportunity to develop skills and experience in this highly-sought area

If you have the motivation and skills, support our team in creating our public profile and designing the online platform that we can use to disseminate our research ideas. You are welcome to contact us at office-bolsover@hpi.de.

We look forward to hearing from you!

Team Office Bolsover
