# The SAP Innovation Center Network

**2011** SAP Innovation Center founded to explore possibilities of HANA, based at Hasso Plattner Institute.

**2013** Move to first building at Campus Jungfernsee (Potsdam, Germany) with around 40 employees.

**2015** Establishment of the global SAP Innovation Center Network (ICN) with additional teams in Silicon Valley, Dresden, Walldorf, St. Gallen, Ra'anana, Singapore, Nanjing, Brisbane and Bangalore.

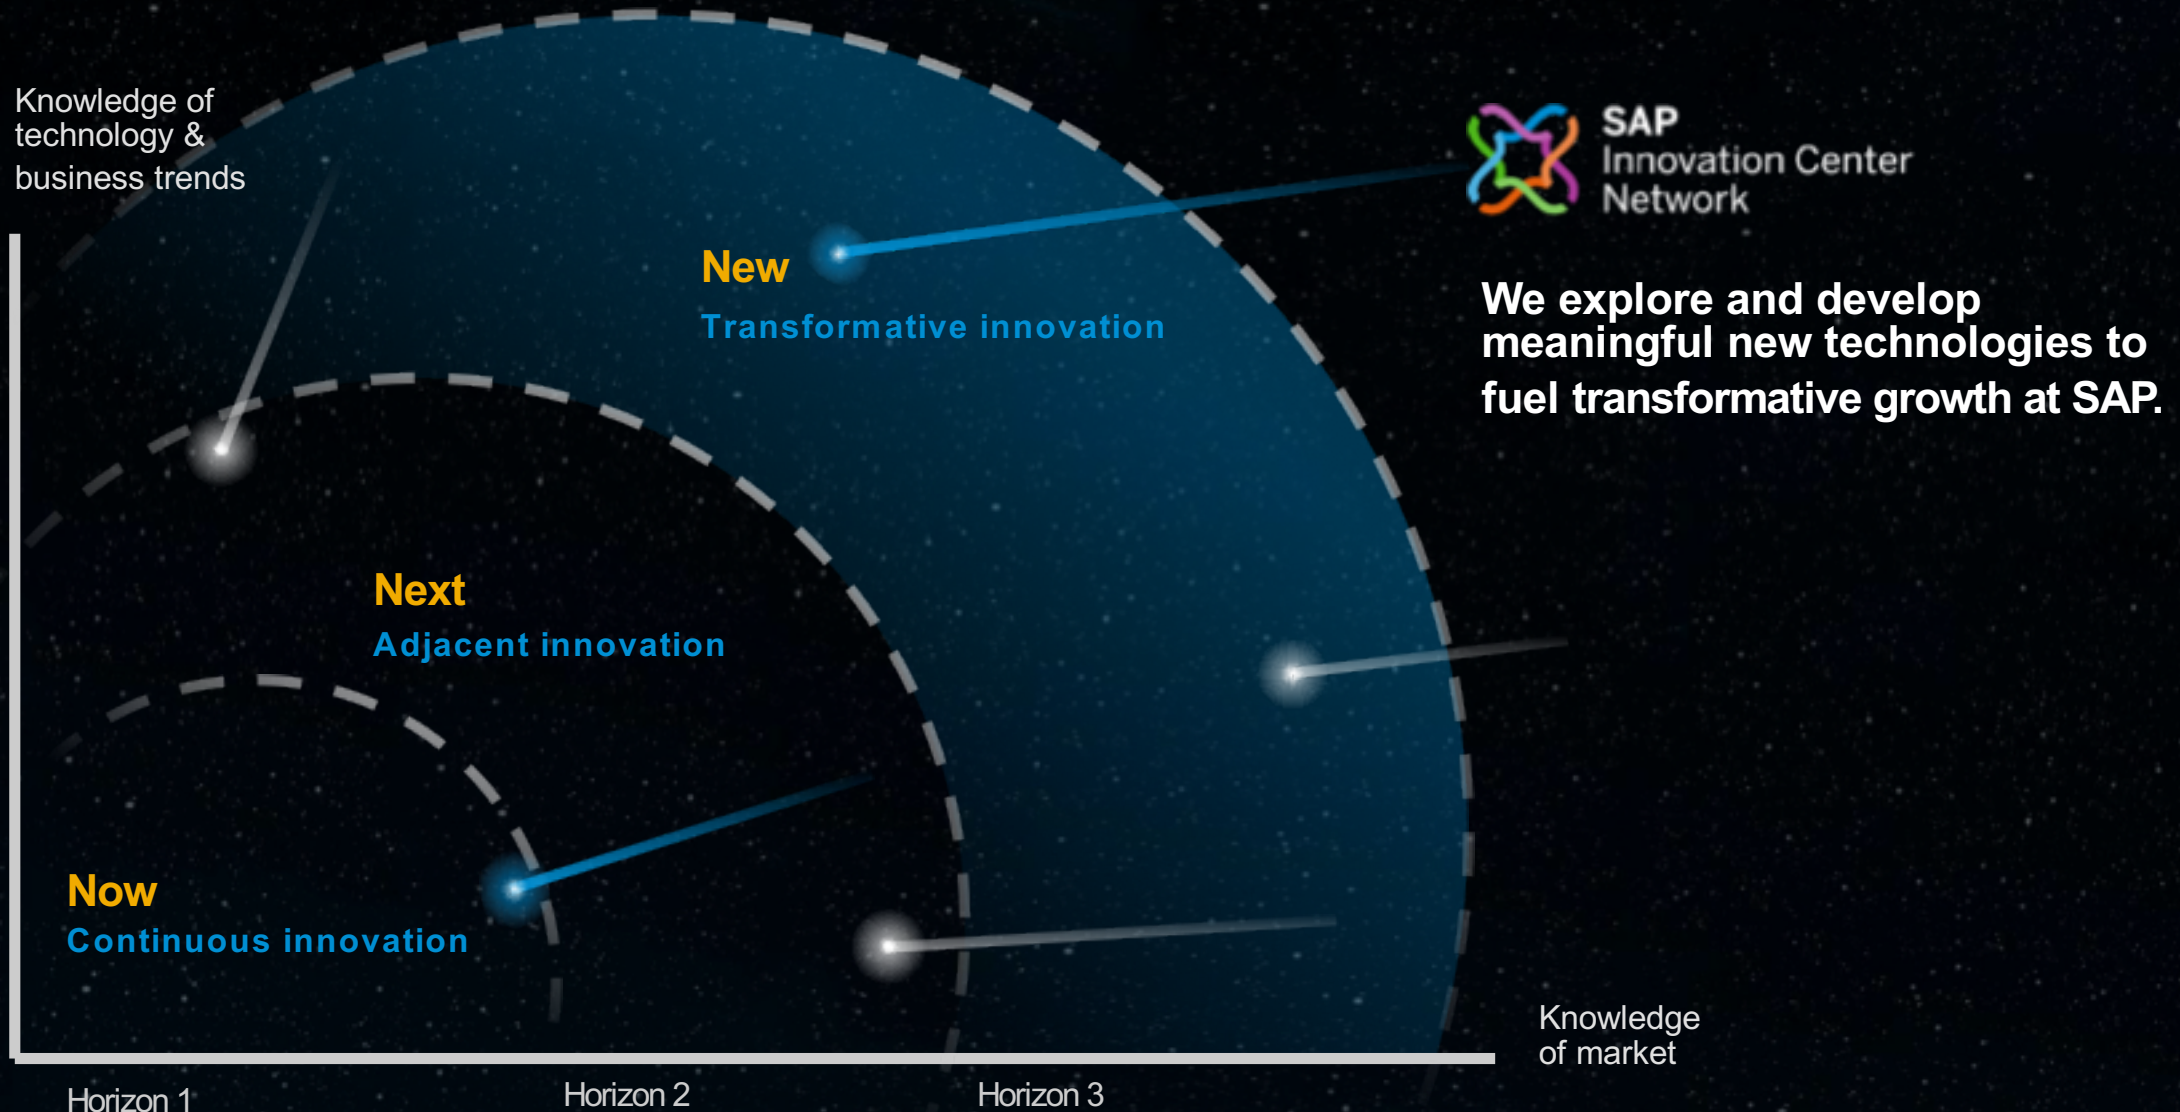

**2016** Appointment of Juergen Mueller as SAP Chief Innovation Officer. (Global responsibility for driving innovation across all of SAP)

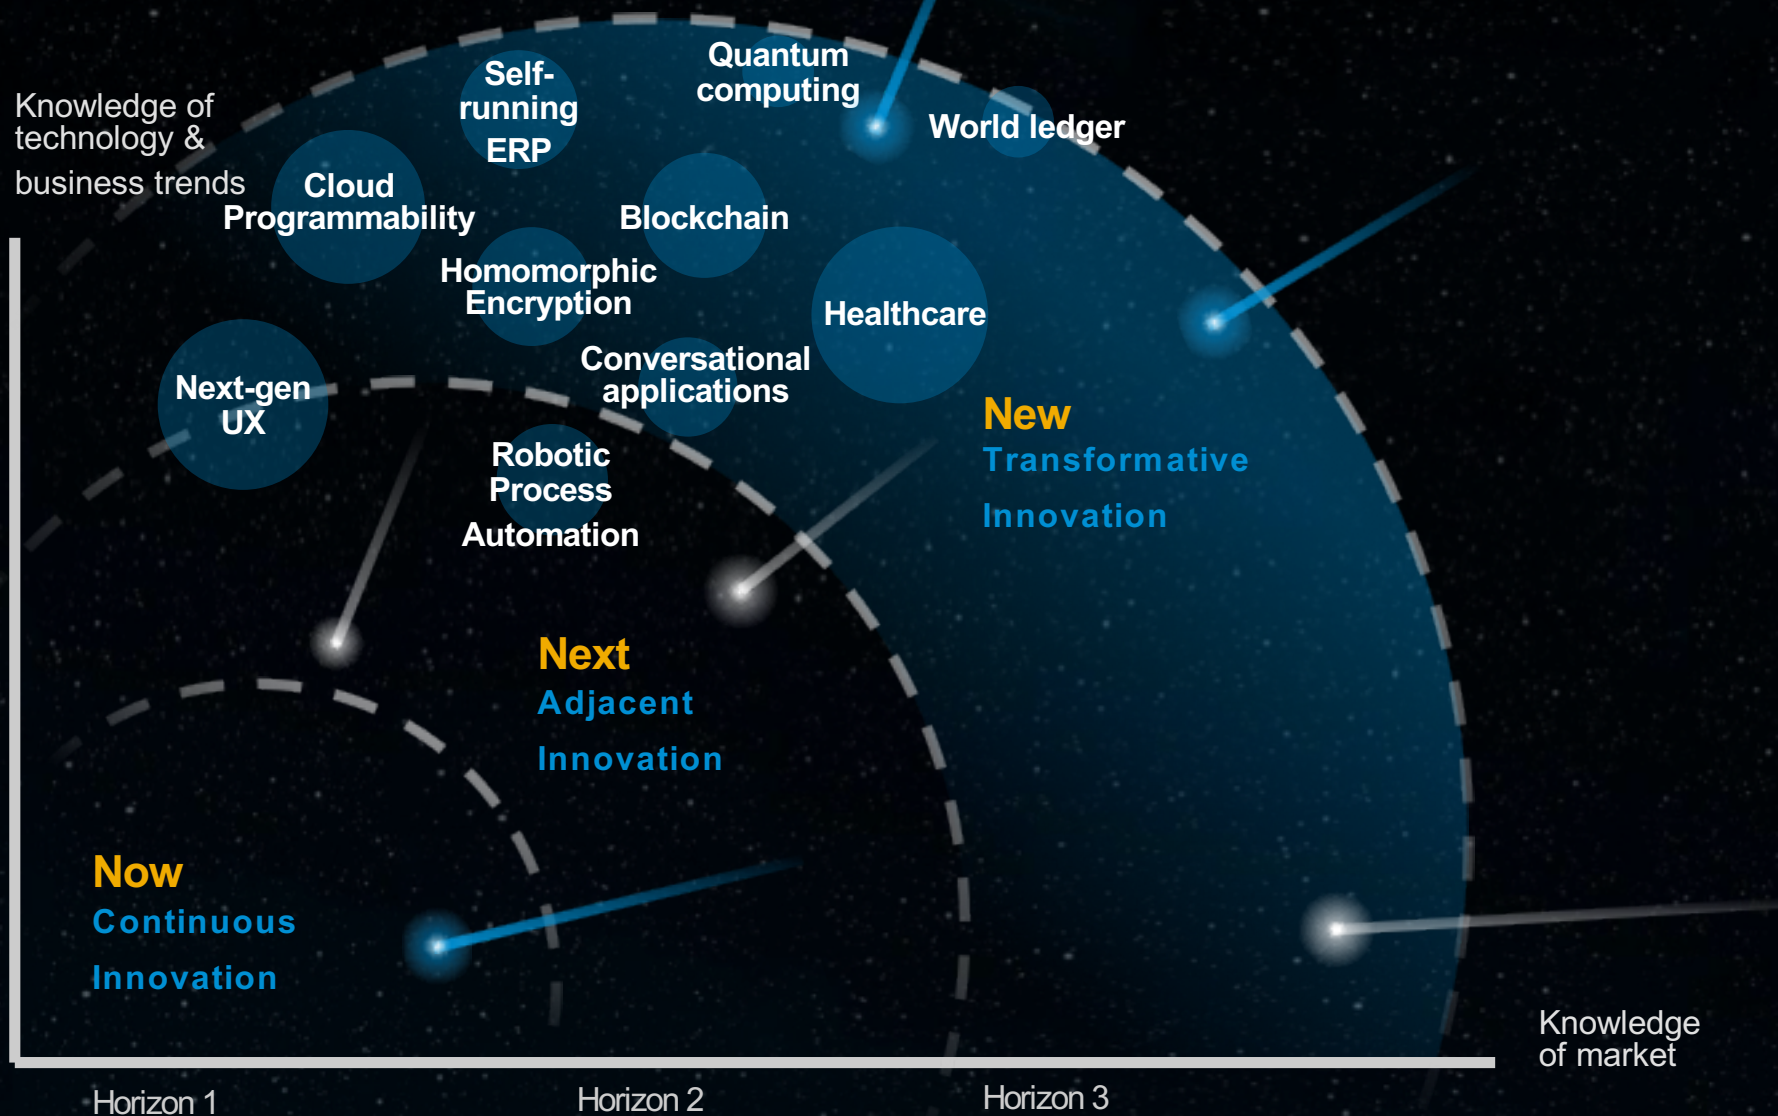

**2018** The SAP Innovation Center Network is powered by more than 250 engineers, designers, product experts, and business developers.

# Our Mission

# Projects

# Agenda

- I. **Scaling Development at SAP**
- II. **Scala**
- III. **Cloud application development kit for Scala**
- IV. **Demo**

# Scaling Development at SAP

# SAP - Scale

## S/4HANA

The digital core

ERP with modules for finance, accounting, controlling, procurement, sales, manufacturing, plant maintenance, project system, product lifecycle management, etc.

31 languages, 61 country versions, 23 industries

on-prem and cloud

**SAP HANA, ABAP, HTML5/UI5**

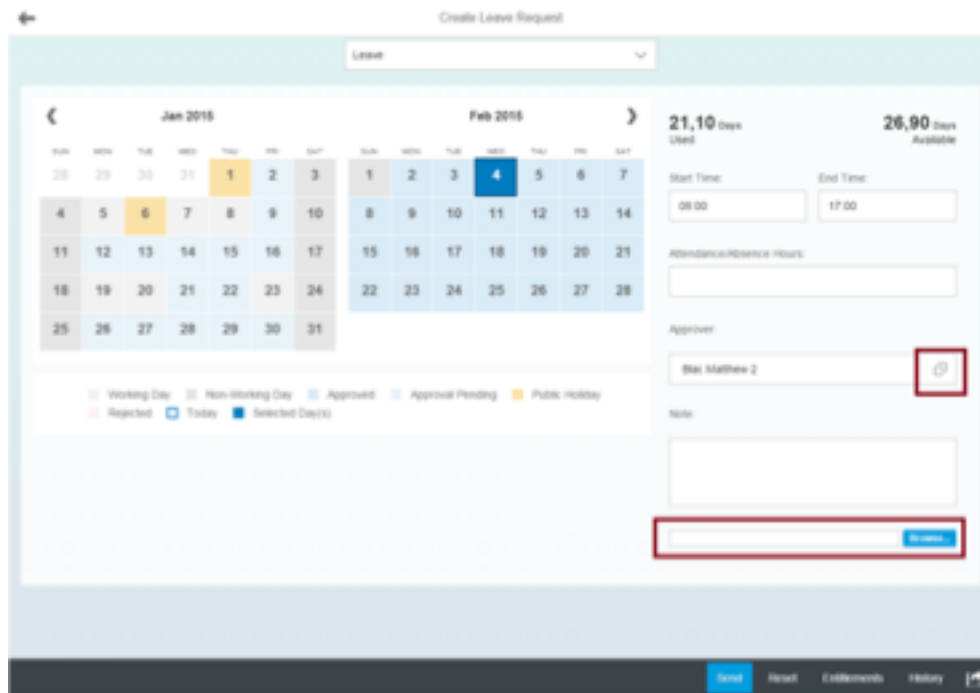

# Scaling Development

## SAP is experienced in scaling development

### | S/4HANA feature set from

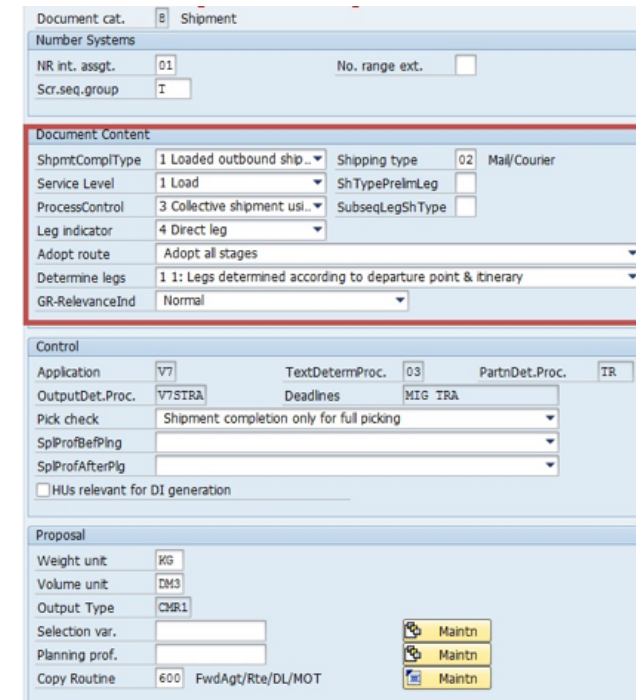

Leave Requests

The screenshot shows the 'Create Leave Request' interface in SAP S/4HANA. It features a calendar view for January and February 2015. The calendar shows working days in grey, non-working days in white, and public holidays in yellow. A legend at the bottom identifies these categories. On the right, there are input fields for 'Start Time' (08:00) and 'End Time' (17:00), and a section for 'Attendance/Presence Hours'. The 'Approver' field is set to 'Bak Matthew 2'. A red box highlights the 'Approver' field, and another red box highlights the 'Submit' button at the bottom right.

to

Freight Cost Calculation

The screenshot shows the 'Freight Cost Calculation' form in SAP S/4HANA. It is divided into several sections: 'Document cat.' (Shipment), 'Number Systems' (NR int. asgmt. 01, Scr.seq.group I), 'Document Content' (highlighted with a red box), 'Control', and 'Proposal'. The 'Document Content' section includes fields for 'ShpmtComplType' (1 Loaded outbound ship...), 'Shipping type' (02 Mail/Courier), 'Service Level' (1 Load), 'ShTypePrelmLeg' (checkbox), 'ProcessControl' (3 Collective shipment usi...), 'SubseqLegShType' (checkbox), 'Leg indicator' (4 Direct leg), 'Adopt route' (Adopt all stages), 'Determine legs' (1 1: Legs determined according to departure point & itinerary), and 'GR-RelevanceInd' (Normal). The 'Control' section includes 'Application' (V7), 'TextDetermProc.' (03), 'PartnDet.Proc.' (TR), 'OutputDet.Proc.' (V7STIRA), 'Deadlines' (MIG IRA), 'Pick check' (Shipment completion only for full picking), 'SpProfBefPng', and 'SpProfAfterPng'. The 'Proposal' section includes 'Weight unit' (KG), 'Volume unit' (DM3), 'Output Type' (CMR1), 'Selection var.', 'Planning prof.', and 'Copy Routine' (600 FwdAgt/Rte/DL/MOT). Three 'Maintn' buttons are visible at the bottom right.

# Scaling Development

- **ABAP** is SAP's current foundation for scalability of development

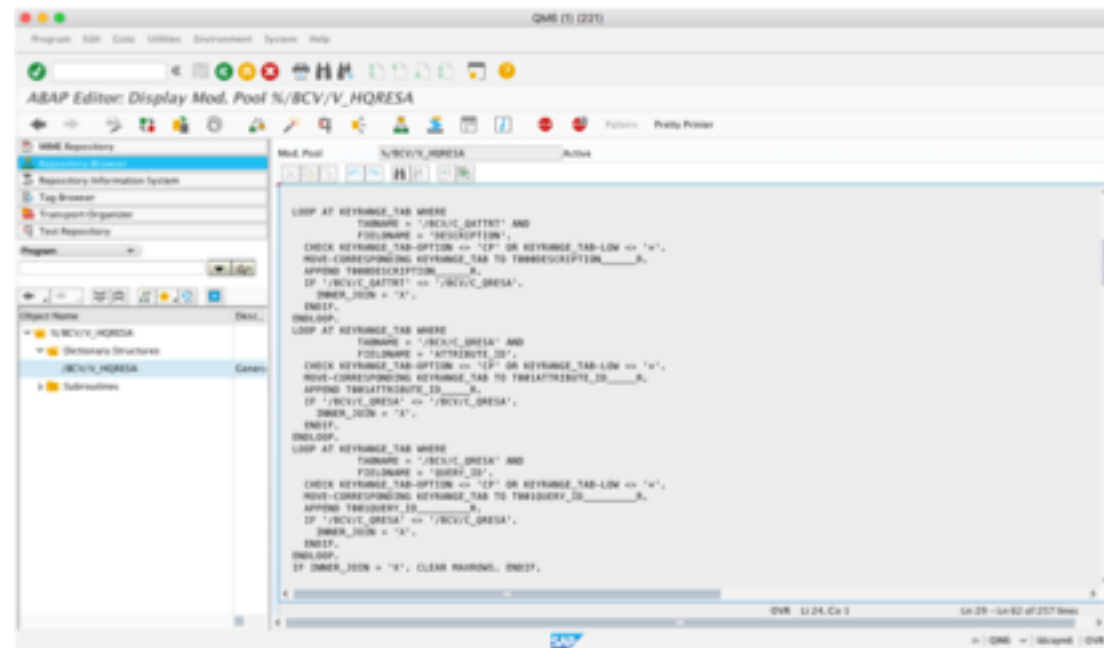

# ABAP

Tailored to building (SAP) business applications (1982)

SAP NetWeaver Application Server (Development and runtime environment)

**ABAP** = **A**llgemeiner **B**erichtsaufarbeitungs**p**rozessor (formerly)  
**A**dvanced **B**usiness **A**pplication **P**rogramming (nowadays)

# SAP Cloud Platform

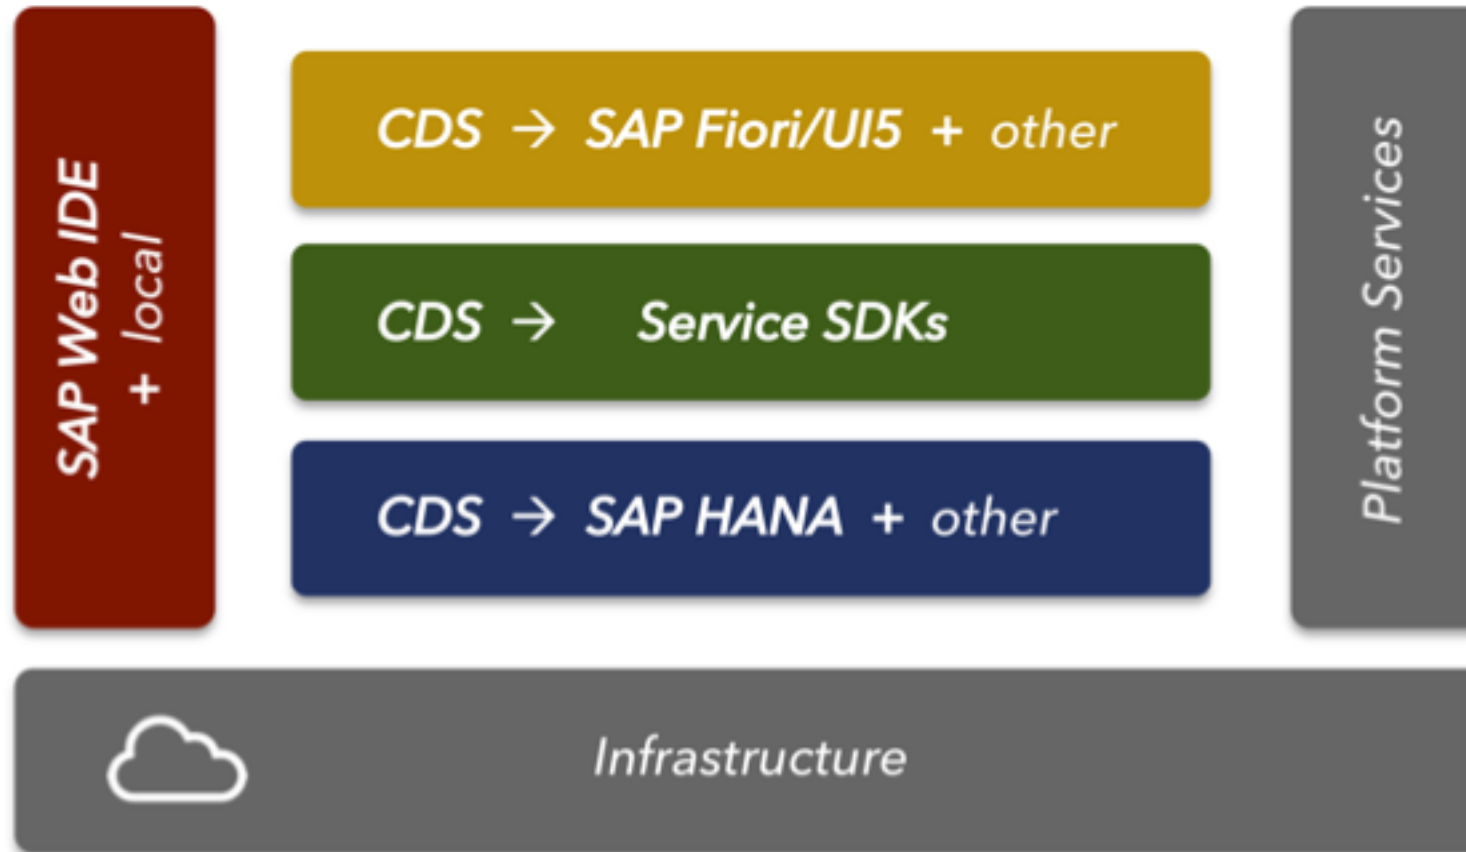

SAP Cloud Platform is an open platform-as-a-service (PaaS).

- Based on Cloud Foundry
- Includes
  - On-premise interoperability
  - Data storage
  - Security
  - APIs, e.g., Successfactors, Concur, S/4HANA
- Embrace variety, e.g., ABAP, Java, Node.JS, Scala

<https://cloudplatform.sap.com/index.html>

# Application Programming Model for SAP Cloud Platform

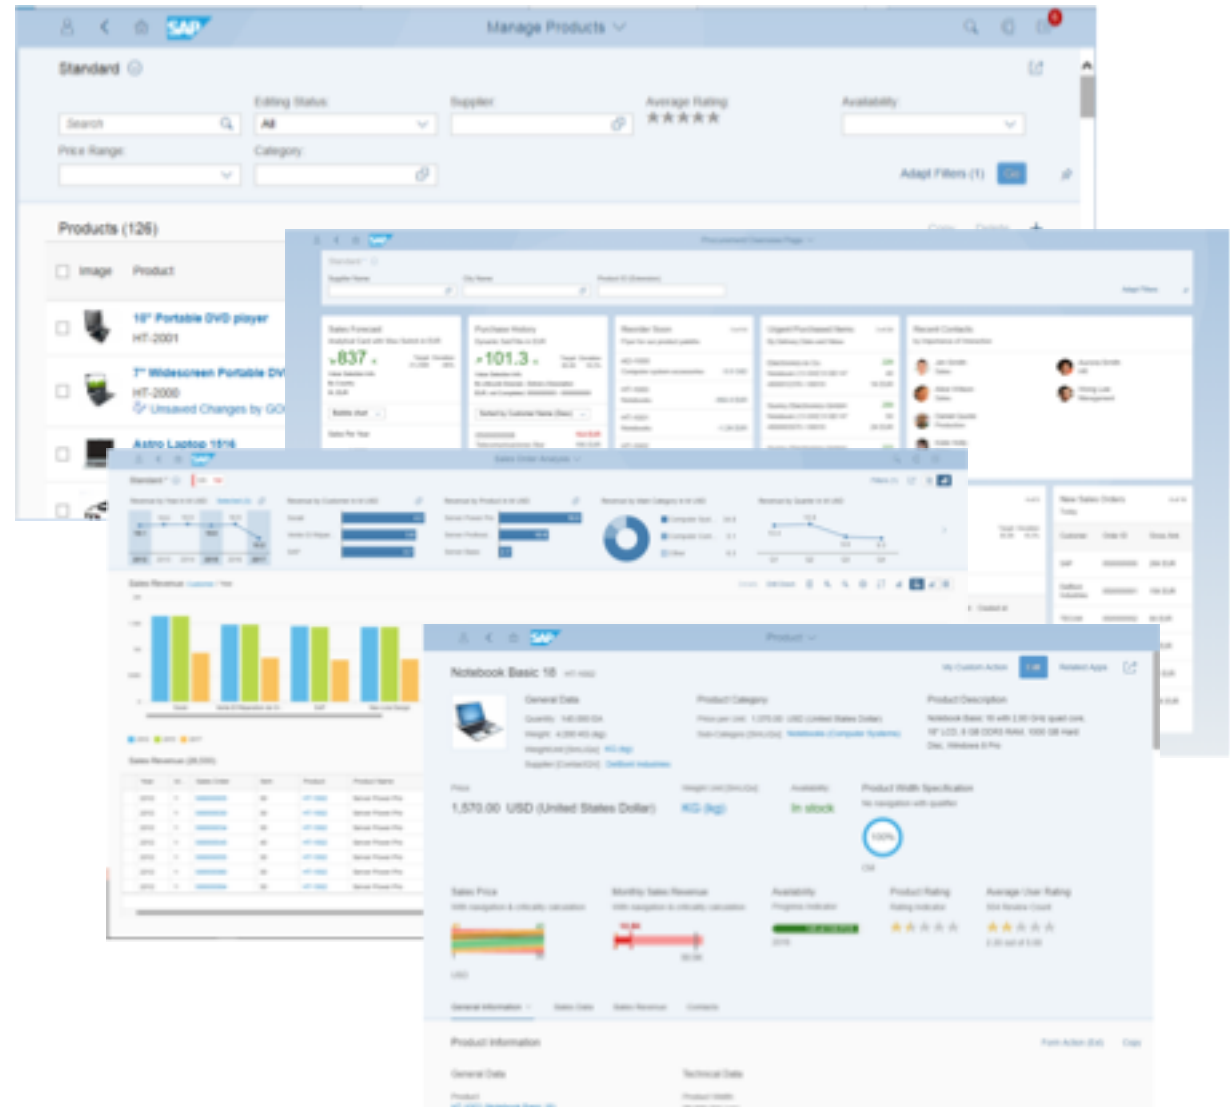

<https://blogs.sap.com/2018/06/05/introducing-the-new-application-programming-model-for-sap-cloud-platform/>

<https://help.sap.com/viewer/65de2977205c403bbc107264b8eccf4b/Cloud/en-US/00823f91779d4d42aa29a498e0535cdf.html>

# Fiori Elements

- Approach
  - Templates
  - UI app as generic as possible
  - App-specific logic in the backend
  - Avoid low-level (hard to maintain) JavaScript

# Cloud Application Development Kit for Scala

## Project description

GOAL

## Scale development for the SAP Cloud Platform

- Cloud application development kit for Scala (set of Scala libraries)

## Building Enterprise Applications with a focus on

- Performance ← Concurrency Model
- Development Efficiency ← Frontend / Backend in the same programming language  
Better IDE support  
Modular building blocks
- Maintainability ← Types

 **Scala** = Simplified  + Functional Programming

(fully compatible to Java)

# Why Scala?

„I think the lack of reusability comes in object-oriented languages, not functional languages. Because the problem with object-oriented languages is they've got all this implicit environment that they carry around with them. You wanted a banana but what you got was a gorilla holding the banana and the entire jungle.

If you have referentially transparent code, if you have pure functions — all the data comes in its input arguments and everything goes out and leave no state behind — it's incredibly reusable.“

---

– Joe Armstrong, creator of Erlang

# Scala – Simplicity for the JVM

```
ListJava.java (~_examples) - VIM
1 import java.util.*;
2
3 public class ListJava {
4
5     void test() {
6
7         List<String> lst =
8             new LinkedList<String>();
9
10        lst.add("1");
11        lst.add("2");
12        lst.add("3");
13
14        List<Integer> ints =
15            new LinkedList<Integer>();
16
17        for (String s : lst) {
18            ints.add(Integer.parseInt(s));
19        }
20    }
21 }
22
```

# Cloud Application Development Kit for Scala

# Cloud Application Development Kit for Scala

## Features

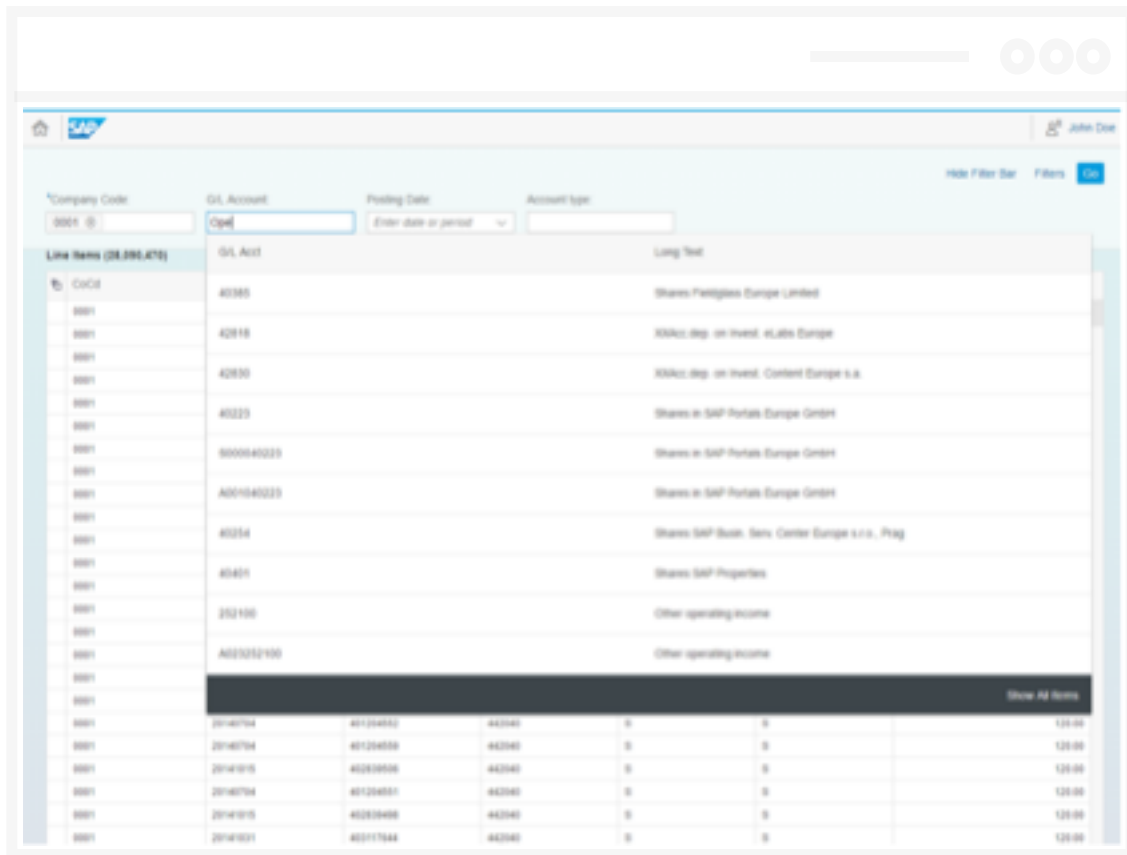

- Read from/write to **SAP data sources**:
  - S/4 (via OData or CDS), ERP (DDIC + DB-level access), etc.
  - Homogeneous query language for many SAP data sources (developer productivity)

```
{sql"select FirstName, LastName, BirthDate from $Persons"}
```

- Write **Fiori/SAP UI 5 applications** using high-level abstractions **in Scala**:
  - Scala code compiles to JavaScript, using facades for UI5
  - Flexible databinding and **reactive** library for UI programming
  - Integration into **Fiori Launchpad**

# Scala

## Financial Accounting Example

The screenshot displays the SAP Financial Accounting interface. At the top, there are search filters for Company Code (0001), GL Account (Open), Posting Date, and Account type. Below the filters, a table lists line items with columns for CoCd, GL Acct, and Long Text. The table is filtered to show items with 'Open' in the GL Account column.

CoCd	GL Acct	Long Text				
0001	40385	Shares Pirelli Europe Limited				
0001	40318	33% St. Regis on Invest. in Latin Europe				
0001	40830	33% St. Regis on Invest. Central Europe s.a				
0001	40223	Shares in SAP Portals Europe GmbH				
0001	800044023	Shares in SAP Portals Europe GmbH				
0001	A00104023	Shares in SAP Portals Europe GmbH				
0001	40314	Shares SAP Busin. Serv. Center Europe s.r.l., Prag				
0001	40401	Shares SAP Properties				
0001	252100	Other operating income				
0001	A021021100	Other operating income				
0001	20140704	40124452	40390	0	0	120.00
0001	20140704	40124450	40390	0	0	120.00
0001	20141010	40209506	40390	0	0	120.00
0001	20140704	40124451	40390	0	0	120.00
0001	20141010	40209490	40390	0	0	120.00
0001	20140331	40117644	40390	0	0	120.00

```
1 @MarmolataClient
2 object DemoApp {
3   val query = SQL"select BUKRS, H_BUDAT, BELNR, HKONT, SHKZG, KOART, DMBTR from BSEG"
4
5   val filter = FilterControl(dataSource = query)
6   .withMandatoryFields(BUKRS)
7   .withHiddenFields(BELNR, SHKZG, DMBTR)
8
9   val table = TableControl(dataSource = filter.filteredQuery)
10
11   val render = filter above table
12 }
13
```

# Demo

# Open Architecture

## Attract Talent

New generation of developers

- Want to work with modern and powerful tools (Scala (2007) not Java (1995))
- Want to work in open-source environment
- consider their github.com [account](#) as their business card
  - A tech company ideally attracts the most talented developers
  - A tech company cannot effort losing the most talented developers
- We will release the Scala project as Open Source

# Summary

## Scale development for the cloud age

Development Efficiency

Performance

Maintainability

## Attract talent

# Thank you.
