

# Audi ASSIST

Explore your car using all senses

AUDI ASSIST is a novel multi-modal car discovery system that puts information at your fingertips. Receive instant information by simply waving your hand over a control. Embark on an audio-visual journey of your car with step-by-step explanation at your leisure. See how AUDI ASSIST intelligently provides information suited to your driving situation.

## Touch

Hidden sensors in the controls detect proximity and trigger information delivery.

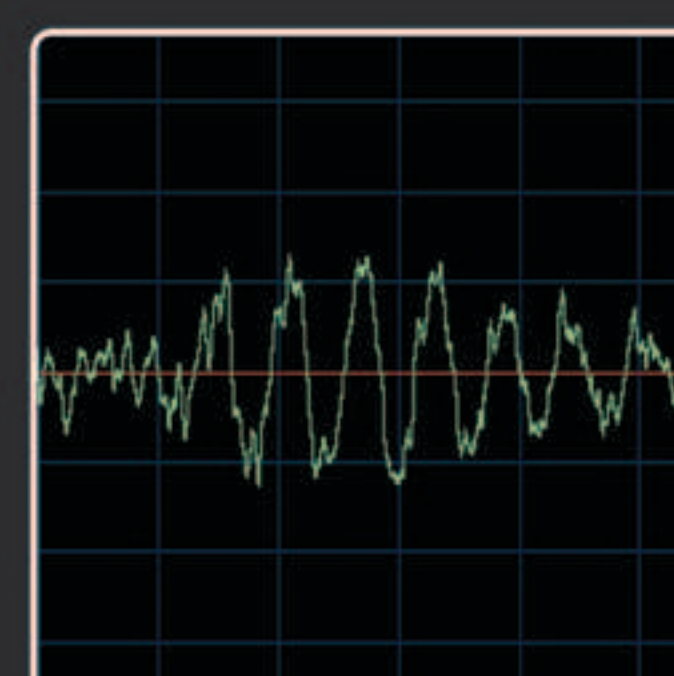

## Watch

Step-by-step instructions help you learn how to use your car's features.

## Context-Awareness

Depending on your driving situation, Audi Assist will suggest relevant features.

## Listen

Tune in to the car channel to hear about your car's features while on the go.
