

## Co-Innovation Project between SSE Technologies and HPI

- "SSE Technologies" is a rather young company
- Founded 29.October 2021 by Michael Perscheid (CEO) and Christoph Matthies (CTO)
- HPI Start-up with the goal to reinvent people culture at universities
- We have a trustful relationship with HPI and we could win it as our first customer and co-innovation partner
- We had luck and could win more than 80 students from day one
- We favor open source software and agile development processes
- Remember: This is just a simulation! So, no money for you ;-)
- Who's that? <a href="https://www.linkedin.com/company/sse-technologies/?originalSubdomain=de">https://www.linkedin.com/company/sse-technologies/?originalSubdomain=de</a>

If you see this logo, we're in the simulation

## Co-Innovation Project between SSE Technologies and HPI

**Customer from HPI** 

Michael Perscheid

CEO of SSE Technologies

**Christoph Matthies** 

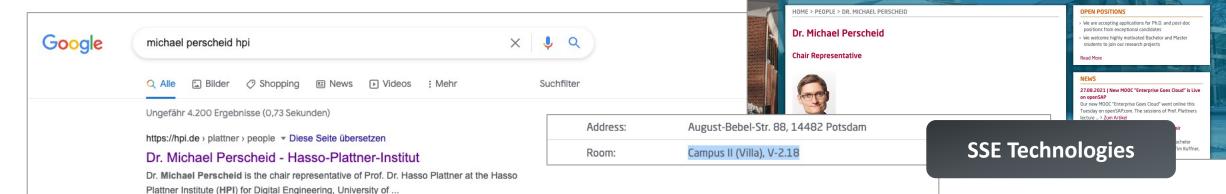

CTO of SSE Technologies

#### No central people portal at HPI

- Information is distributed on multiple web pages, not unified, sometimes out of date
- You will need background knowledge or the help of google
- Where can I find someone and how to get there?
- Situation is even worse if you don't know the name but rather looking for a specific role
- Or even more worse, if you are looking for non-human point of interests (cafeteria, toilettes,...)

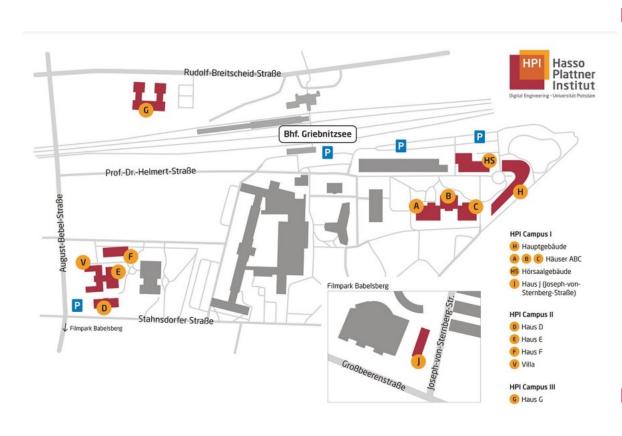

Prof. Dr. h.c. Hasso Plattner

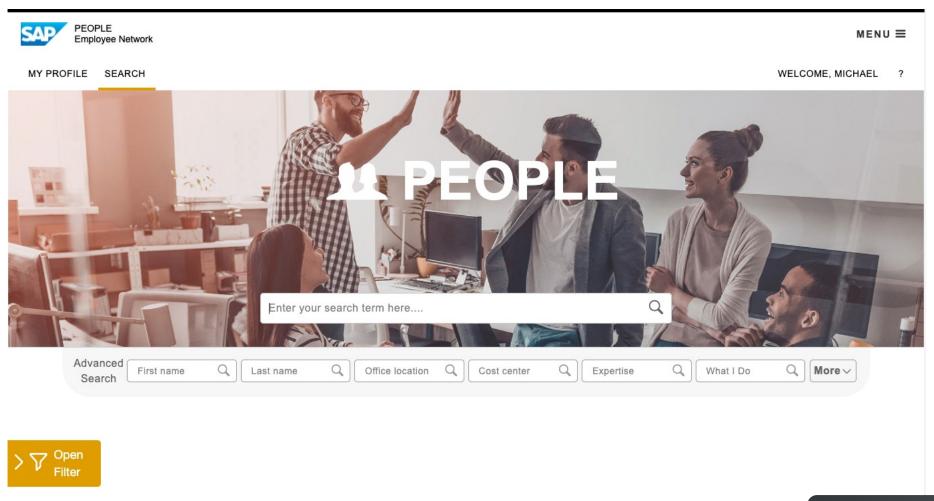

# Remember your first semester (and maybe still valid)

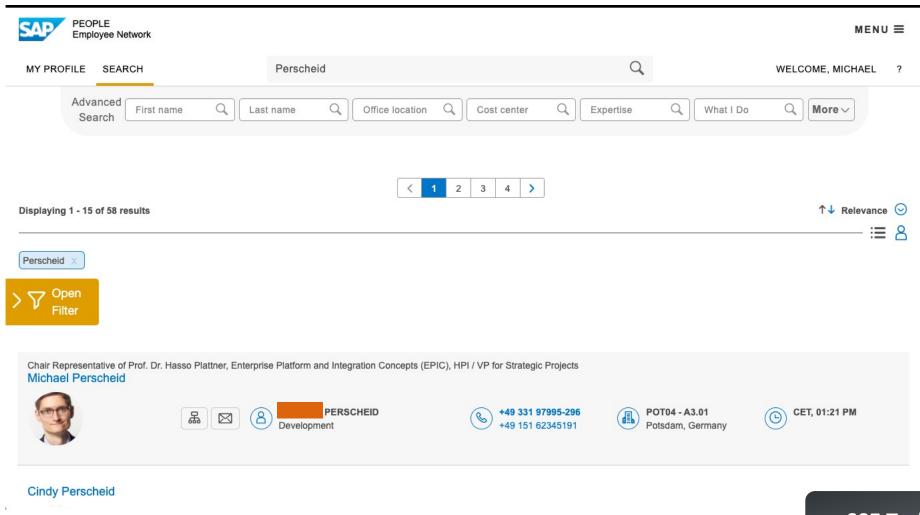

- All you get for navigation is this highlevel map w/o indoor information
  - Where is Ulf?
  - Where is the next toilette?
  - How long do I need from A to B?
  - Which access rights do I need?
  - Where am I?
  - How to meet my friends?
- The HPI has grown a lot over the last years and it will continue

Leave your starting point.

<sup>\*</sup> Similarities to existing applications are purely coincidental.

**SSE Technologies** 

#### Will You Finish the Project?

- 1. How many people and how much time will you need?
- 2. Can you finish the project in time (3 months, 40 students)?
- 3. With which quality?
- 4. Can three full-time equivalents (FTE) finish it in three months?
- 5. Wanna bet?
- 6. What is the definition of done?

About 40 students per project with 6 ECTS each = 1 day (8 hours)

- Lecture (3 hours)
- Meetings and Operations (2 hours)
- ⇒ At best, 3 hours of productive time per student per week
- $\Rightarrow$  120 hours per week
- $\Rightarrow$  ~3 Full-time equivalents (FTE) for three months
