

Notes SWTII Lecture

29.11.2019

Biggest challenges in the project up to now have been...

- communication between teams regarding dependencies and who is responsible for foundational changes
- knowledge of libraries that are included in the project
- Continuous Deployment specifics, using a Docker file
- design-Teams: Communication and collaboration with rest of the teams. Creation of wireframes as Design-Teams vs. PO
- Definition of a common Definition of Done
- Prioritization of features/tickets by business value
